

External Release Notes – Insights Global Dashboards (1/10/24)

Today, the Insights team released three new Global Dashboards and updates to three other existing ones. These changes are detailed below.

HDE for ESO EHR Global Dashboards:

We have updated three existing Global Dashboards.

Type of Change	Dashboard Name	Description
Enhancement	“EMS Hospital ED Disposition”	Updated filters for enhanced performance.
Enhancement	“EMS Hospital ED Diagnosis Stroke”	
Enhancement	“EMS Hospital ED Diagnosis STEMI”	

HDE for NEMESIS/Hospitals Global Dashboards:

We have added one new Global Dashboard.

Type of Change	Dashboard Name	Description
Net New Dashboard	“Hospital Ambulance Patient Offload Times (APOT)”	This Dashboard analyzes all transports to HDE hospitals and their APOT times. The metric is used to assess the operational performance with regards to receiving patients from EMS. This report replaces the Analytics Report: Average Turnaround Time by Agency.

Fire Incidents Global Dashboards:

We have added one new Global Dashboard.

Type of Change	Dashboard Name	Description
Net New Dashboard	“Daily Shift Report”	This report examines incident details from calls that occurred in the last 7 days.

Properties & Inspections Global Dashboards:

We have added one new Global Dashboard.

Type of Change	Dashboard Name	Description
Net New Dashboard	“List of Multifamily Dwelling Buildings By Local Alarm Area”	This report examines multifamily dwellings by station.
