

**Release Notes for Insights: Fire Incidents Global Dashboards**

**Released:** 3/31/23

The following ESO Global Dashboards for Fire Incidents were updated and released:

- AFG - Fire Incidents
- Fire Resources - Personnel and Units (Call Volume)
- Fire Index
- Fire Incident Count
- NFPA - Turnout Compliance

The details of what was update are included in the table below. The rationale for these changes is that the values in `[Basic Module].[Incident Number]` aren't necessarily globally unique and there could be duplicate values contained in this column. As such, if you are counting unique incidents through Insights, you should consider using `[Basic Module].[IncidentID]` for counting unique incidents in your own Dashboards.

<b>Global Dashboard Name</b>	<b>Changes</b>
AFG - Fire Incidents	Updated all <code>COUNT([Incident Number])</code> values to <code>COUNT([IncidentID])</code>
Fire Index	
Fire Incident Count	
Fire Resources - Personnel and Units (Call Volume)	Updated "Count of Total Incidents" calculation from <code>COUNT([Incident Number])</code> to <code>COUNT([IncidentID])</code>
NFPA - Turnout Compliance
