

EHR Release 5.5 (All Agencies)

July 23, 2016

Incident Details Tab

Personnel

For crew member documentation, when applicable, the *PPE/Exposures* section is now located in the *Personnel* section.

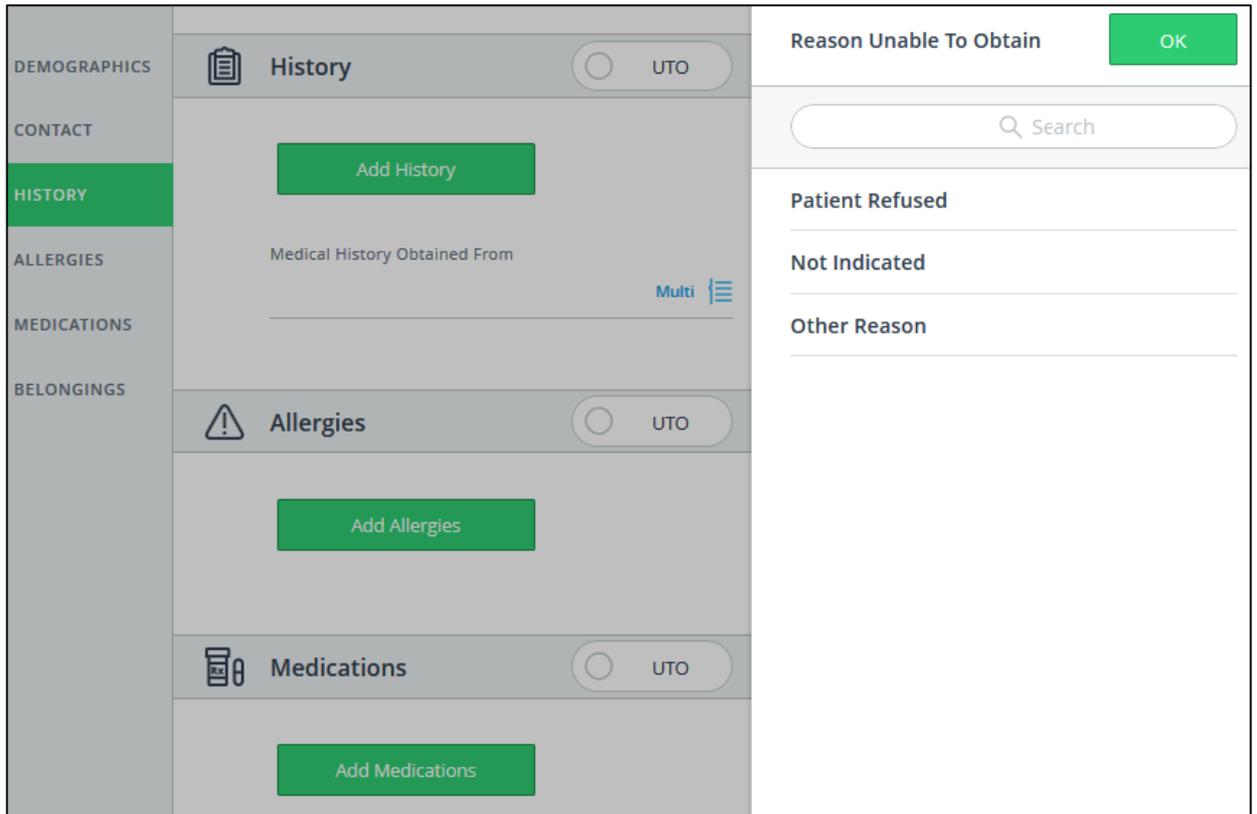

If activated: The **validation rule** for protective equipment now requires at least one personnel to document.

Patient Tab

History, Allergies and Current Medication

Unable to Obtain (UTO) is now available for each category, along with a short list of reasons why the information was unobtainable. **

Please Note: Agencies who share records using EHR Mobile to Mobile **must take this upgrade to transfer/receive this pertinent negative information.

Flowchart Tab

Other

Stroke Alert, STEMI Alert, Trauma Alert “Not Performed” option, and a multi-select list, to choose reasons not performed. **

The screenshot displays the 'Stroke Alert' form in the ESO EHR system. The top navigation bar includes icons for FLOWCHART, ASSESSMENTS, NARRATIVE, FORMS, BILLING, and SIGNATURES. The main content area shows a list of alerts on the left and a detailed form on the right. The form includes a 'Not Performed' toggle, a 'Prior to Arrival' toggle, and various input fields for patient information and clinical details.

The screenshot displays the 'Reason Not Performed' form in the ESO EHR system. The form includes a search bar and a list of reasons for not performing the alert. The reasons are: Age, Exam Finding is not Present, Glucose < 50 or > 400 mg/dL, Hypertension, Medical History, Minor Symptoms or Rapid Improvements, Potential Subarachnoid Hemorrhage, Pregnancy, Seizure at Onset of Stroke Symptoms, Surgical History, Symptom Onset/Last Seen Normal of Treatment, and Traumatic Event at Onset.

Please Note: Agencies who share records using EHR Mobile to Mobile **must take this upgrade to transfer/receive this pertinent negative information.
